

40% of burglaries involve the force of a door set

Introducing the Yale Cylinder Range

At Yale we understand how important it is for you to feel secure within your home. We therefore continually invest in innovation so that Yale products evolve making sure our cylinders hold up against the latest attack methods. This in turn delivers the quality you have come to expect from Yale products.

From standard security to maximum security Yale has it covered with a comprehensive range which meets your requirements.

Yale believes standards are important which is why we have just launched the Platinum euro profile cylinder, our maximum security cylinder with a range of great features which are designed to withstand the most determined attack.

Standards Explained

TS007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3 star rating system, and can be achieved by combining a 1 star cylinder with a 2 star security door furniture or using a stand alone 3 star cylinder. The Platinum Series Euro Profile Cylinders are approved to TS007 3 stars and do not require any additional security furniture.

TS007:2014

TS007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3★ rating system, and can be achieved by combining a 1★ cylinder with a 2★ security door furniture solution or by using a 3★ stand alone cylinder.

This standard is endorsed by the Door and Hardware Federation, BSI and Secured by Design, offering the very best level of cylinder security for your door.

Yale recommend using a Platinum Series 2★ handle in conjunction with a 1★ cylinder from the Yale KM series or a 3★ Platinum Cylinder, providing the best level of protection against cylinder manipulation attack.

ASSA ABLOY

BS Doormaster™

The new Yale PAS3621 British Standard Doormaster is the ultimate solution for uPVC, timber and composite doors. The Yale BS Doormaster lock is currently the only multi-point lock that carries the British Standard Kitemark and offers a suitable retrofit replacement product for PAS24 doors without the need to fit an exact like for like replacement lock.

It will also improve the level of lock security. Fitting PAS 3621 multipoint locks will maintain PAS 24 accreditation on existing doorsets providing there are no alterations made to the doorset.

PAS3621/8621 is now specified in Doc Q & NHBC Building Regulations as the multipoint equivalent to BS3621/8621.

Yale®

Is your cylinder lock the weak point in your home security?

Homes which don't have basic security are 10 times more likely to be burgled

40% of burglaries in England and Wales involve the forcing of a door

Cylinder attacks are on the increase

3.4 million spare keys 'hidden' around peoples homes
22% of people trust their neighbour with a spare key
2 thirds of homeowners DON'T change their locks when they move

1 in 20 people give out keys to tradespeople

CHANGING YOUR CYLINDER IS ONE OF THE QUICKEST AND EASIEST METHODS OF UPGRADING YOUR HOME SECURITY IN MINUTES

It takes 50 secs to 2 minutes to break a basic Euro Profile Cylinder lock and gain entry to your home

Yale has a complete range of locks to meet your security needs. Check the cylinder range now at www.yale.co.uk or go to your local Yale stockist.
